DO NOT CIRCULATE

25X1

1. During the period from 17 to 28 April 1951, there was daily flying at Strausberg airfield with not more than five planes being aloft at one time. Acrobatics were being practiced at high altitudes. No aircraft were parked at the field. However, planes may have been in the hangar. It was observed that the antenna rod on the aircraft pointed forward at an 45° angle. There was some sort of Bola (sic) beneath the fuselage in line with the wing trailing edge. *

2. The fuel tanks at the field were still lying on the ground. On 26 April, two new tank trucks for the airfield arrived at the Strausberg railroad station

* [REDACTED] Comment. The report indicates that there has been no change in the occupation of the field. According to previous information supplied [REDACTED] at least four La-type fighters, presumably La-9s or La-11s, are stationed at the field. [REDACTED] The Bola may have been a radiator.
